

User Persona Development

Introduction

A user persona is a fictional representation of a target user. It helps designers understand user needs, goals, behaviours, and frustrations while creating user-centred products.

Persona Profile

Basic Information

Name: Priya Sharma

Age: 21 Years

Occupation: College Student

Location: Hyderabad, India

Education: B. Tech Student

Goals

- Buy products quickly online
- Complete checkout without confusion
- Find products easily
- Save time while shopping

Frustrations

- Slow loading websites
- Complicated navigation
- Too many unnecessary steps
- Difficult payment process

Needs

- Fast website performance
- Simple user interface
- Easy search functionality
- Secure payment options

Preferred Devices

- Smartphone
- Laptop

Technical Skills

- Intermediate Internet User
- Uses Mobile Apps Daily
- Comfortable with Online Payments

Conclusion

This user persona represents a typical college student who frequently uses online shopping platforms. Understanding such users helps designers create better and more user-friendly experiences.
